

Climate Investment Summit

September 7-8, 2021, Copenhagen, Denmark

DIGITAL & LIVE EVENT

Climate Investment Summit is closely following the guidelines of WHO and local health authorities to ensure that all required protocols are observed in our services to guarantee the safety of our community and to conduct any of our work live, digital or in a hybrid format of these.

The Climate Investment Summit 2021 is a globally leading summit to increase investments in climate and green recovery - built on experienced practitioners, best practice business models and cross-sector collaboration.

Introduction

The Climate Investment Summit 2021 aims to accelerate investments in clean energy and climate projects in order to achieve the goals of the Paris Agreement and a green recovery through best practice models, including green infrastructure investment models, new energy technologies, enabling policy frameworks, de-risking of projects and the creation of investable project

Objectives

In connection to its role as a key event in the Climate Investment Coalition's roadmap to COP26, the Climate Investment Summit will act as a unique and leading global forum for the practice of financing and investing in global climate solutions. The Climate Investment Summit will:

Act as a valuable platform for Nordic and European institutional investor announcements on the road to COP26.

Engage key decision-makers on agenda items including achieving a green recovery, EU's Green New Deal and the US' Build Back Better plan.

Position Northern and Western Europe (North Sea) as an incoming clean energy powerhouse, sharing green investment strategies and successes.

Present thought leadership on new energy technologies to accelerate global decarbonisation and the net-zero transition including power-to-x, green hydrogen, carbon capture storage, smart grids and more.

Engage cross-sector delegates in matchmaking for business development to increase investments in selected emerging and developed markets.

- Presentations, panel
- discussions & side events
- Workshops & interactive dialogues
- High-level keynote presentations
- Interactive & one-on-one networking opportunities

Roadmap to COP26 2021

Key Focus Areas in 2021

| | | | |
|---|--|--|--|
| Investment Roadmap to COP26 | Mobilising Green Investments in Emerging & Developing Markets | Building & Global Green Powerhouse in the North Sea | The Energy Technologies of Tomorrow |
| <p>Engage with governments, investors, business and civil society to mobilise climate finance and solutions in green investments to reach 2030 climate targets and support the net-zero transition.</p> | <p>Support accelerating green investments through public-private collaboration, best practice financial vehicles and specific country cases.</p> | <p>Present global business and climate opportunities to increase investments and partnerships to harness the North Sea's potential as a renewable energy powerhouse to decarbonise Europe by 2050.</p> | <p>New energy technologies to accelerate global decarbonisation and net-zero transition including power-to-x, green hydrogen, carbon capture, storage, smart grids and more.</p> |

Participants

The Summit will gather leading international stakeholders such as:

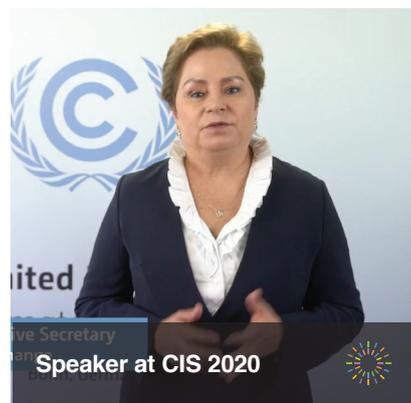

Asset owners, including pension funds, sovereign wealth funds, foundations and other investors,

Asset managers, including investment banks, infrastructure funds and other financial institutions representing public and private finance,

Developers, including project developers, energy companies and utilities, and technology providers,

Government representatives from the state, regional and local level, and their associated bodies,

International organisations, global initiatives and alliances representing public and private interests.

Speaker at CIS 2020

Patricia Espinosa, Executive Secretary, United Nations Framework Convention on Climate Change (UNFCCC)

“

It is a pleasure to take part in this important Climate Investment Summit. Your contribution has been and will remain crucial for the success of the global efforts on climate change. Finance is the live plot of the economy. The transition towards a green and clean sustainable economy will ultimately depend on the availability of adequate funding.

”

Climate Investment Summit 2020

The Climate Investment Summit 2020 presented groundbreaking announcements and welcomed nearly 900 registered delegates including asset owners, asset managers, solution providers and governments to spur and accelerate growing green investments. The Summit welcomed 45 high-level speakers, including **H.E Dan Jorgensen**, Danish Minister for Climate, Energy & Utilities, **Nigel Topping**, UK High-Level Climate Action Champion, **Ban Ki-moon**, Global Center on Adaptation, 8th Secretary-General of the United Nations, **Patricia Espinosa**, Executive Secretary, UNFCCC and **Faith Birol**, Executive Director, IEA and many more.

Highlights from the Climate Investment Summit 2020

The successful Climate Investment Summit 2020 welcomed nearly 1000 delegates and 45 speakers over two days.

Insurance & Pension Denmark announced Danish pension funds have already invested USD 8 billion in green projects since the 2019 Climate Action Summit in New York. This far exceeds earlier predictions and sets the pension funds on the road to reaching their target of USD 50 billion in green investments three years ahead of time.

Finance Denmark presented an ambitious commitment to support private Danish citizens' investments in the green transition, committing that by 2030 CO2 emissions from investment funds offered to Danish citizens must be 75% below the emissions of the world equity index (MSCI ACWI) in 2020.

The Climate Investment Coalition launched a process with pension funds in the other Nordic countries, in the Netherlands and internationally to build on the work of the coalition and contribute with commitments to green investments leading up to the COP26 to be held in Glasgow in November 2021.
